Course Fee Structure

Innomatics Research Labs — RAG Knowledge Base

Current website position

The current official website does not provide one reliable universal fee table for all major programmes. A current Data Science page says fees vary by programme duration, mode and ongoing offers and advises contacting the team for accurate current fees.

Older website fee table

An older NASSCOM page currently visible on the website lists Data Science Classroom ₹87,600, Data Science Online ₹75,000, Full Stack Classroom ₹75,800 and Full Stack Online ₹65,800. These should NOT be treated as current programme fees without verification.

Project-supplied values

- Advanced Data Science with Gen AI — ₹1,40,000
- Advanced Data Analytics — ₹60,000
- Full Stack Web Development — ₹1,00,000
- Advanced Generative AI — ₹1,00,000

Chatbot rule

The project-supplied values may be used only if the project owner approves them as current knowledge-base values. Otherwise, the chatbot should say that current fees must be confirmed with the institute.

Do not invent

Do not invent GST, EMI, discounts, registration fees, refund rules or instalment schedules.
