Projects, Practical Training and Internship

Innomatics Research Labs — RAG Knowledge Base

Hands-on learning

The website emphasizes live projects, capstone projects, real-world case studies and industry-relevant assignments.

Examples

• Vehicle detection using deep learning for traffic monitoring

• n8n automation pipelines

• Power BI dashboards

• Real-world datasets and business use cases

Internship

The institute describes in-house internship opportunities that provide practical exposure to business challenges. Conditions can vary by programme.

Data Science with GenAI internship

A dedicated internship page describes a free, unpaid internship with real-world projects, portfolio building, LMS access, webinars and hackathons. That page states a three-month duration and specific prerequisites.

Full Stack example

The Full Stack course page states that learners work on 20+ projects, capstone applications and industry-relevant assignments.

RAG rule

Keep internship details programme-specific; do not apply one internship's conditions to all courses.
